## TO WHOM IT MAY CONCERN

I have known and worked with RAY HATCH for the past one and a half years. As Demolition Manager for T&T Metal Trading Pty Ltd, Ray has demonstrated strength in all aspects of quality and time issues in the demolition of fuel tanks and mine infrastructure. He has the ability to work effectively with customers and other contractors, as demonstrated on the major Fuel Tank Demolition at Flying Fish Cove Fuel Farm.

Flying Fish Cove - Fuel Farm Demolition

\$250K Project

Ray has been an extremely high achiever in a difficult and remote location, has successfully completed the significant demolition project listed above, and has "second to none" experience and knowledge in the demolition game. His assistance in any project planning and delivery is first class, with our client completely satisfied with the end result.

I have immense confidence in his and T&T Metal's abilities and their commitment to quality and honesty. Consequently I have no hesitation in recommending him for other works and wish him every success for any future ventures.
